

New Statement of Purposes, 2013

At a Members' Special Meeting held on Wednesday 23 October 2013 at the Lake Daylesford Book Barn, it was unanimously agreed that the GDTA would:

- Strategically develop and maintain, where feasible, new and existing tracks in conjunction with land managers and other stakeholders.
 - Ensure that the information provided to walkers and riders on its tracks is up to date and of a high quality.
 - Provide leadership, strategic advice and assistance to local, regional and state government organisations involved in walking and mountain bike activity.
 - Carefully use its funds wisely and creatively, taking account of new web, mapping and interpretation technologies including apps.
 - Actively and strategically support similar activities of other selected groups and organisations.
 - Provide opportunities for new sorts of membership, affiliation and involvement more appropriate to mainly younger, Information-and-Communication-Technology-based generations.
 - Maintain and provide new and different opportunities (aside from business meetings) for socialization and less formal involvement of its existing and previous members (and new 'Friends').
 - Identify and promote walking and mountain biking options and events that dovetail with existing train and bus timetables.
-

GDTA New Statement of Purposes, 2013: Item 2, p4 of New Model Rules, also approved by GDTA, 23 October 2013
